

Student Internship

for the future Salesforce developers

Everybody knows for Salesforce,
am I right?

What exactly is Salesforce?

You can automate almost any business process.

Salesforce can be integrated with your existing applications that you use such as ERP and many others.

Salesforce enables business automation, not just classic CRM

You can fully automate your sales, marketing, production and administrative processes within your company.

The world's number 1 CRM system used by the world's leading corporations and brands

Did you heard about Intermino?

Founded in 2017 in Serbia with the goal of becoming a premium Salesforce Consulting Partner.

We are an official Salesforce Consulting Partner.

Our clients are some of the most famous IT companies in the world.

What we have promised
to our clients?

Hire top 5%
Salesforce
professionals.

Why attend a student internship at Intermino?

You will learn a lot about Salesforce.

You will gain great experience working on the platform.

You will prepare for your first Salesforce certification.

You have the possibility of getting the first job

What you need to intend the internship?

Basic capacities required for communication: functional e-mail address, a computer connected to the Internet, a microphone, speakers, webcam, and quiet place to work (office, bedroom, workroom, park, car...)

A lot of motivation and hard work because we have a high criteria for internship results.

Intermediate level of English language.

Approximately 8 hours a day dedicated to practice for two months. (Monday-Friday).

Internship plan

First month: Theoretical knowledge of Salesforce. Why?

Because you need basic knowledge to be able to develop the application.
Theoretical knowledge will help you pass the Salesforce certification exam.
Our seminars and workshops will spread your knowledge.

Second month: Practical knowledge. Creation of full-stack application in Salesforce.

Creation of the data model and database.
U can choose if you want to use code and/or point & click.
Creation of UX/UI design concept. Then start building the application.
You have to prepare the application for quality control and launch.

How your internship day is gonna look like?

First month

Morning meetings with mentors,
Passing the material intended for that day,
Occasional seminars,
Tasks resolving,
Sending the daily report at the end of the day.

Second month:

Morning meetings,
Application development,
Individual meetings with mentors about app development,
Sending the daily report at the end of the day.

Thank You!
